SUBJECT INDEX TO VOLUME 29, 1983

[A]

Acanthamoeba palestinensis 429
acetic acid bacteria.....157
Acetobacter aceti 417
Acetobacter aceti subsp. *aceti* 327
Acetobacter aceti subsp. *liquefaciens* 327
Acetobacter aceti subsp. *xylinum* 327, 417
Acetobacter liquefaciens 157
Acetobacter liquefaciens sp. nov. 327, 417
Acetobacter xylinus sp. nov., nom. rev. ...417
actin filaments..... 73
alcoholic fermentation, for glutamine production by energy-coupling 355
Anaerobe 507
anaerobic isolation of single cells 167
arginine, effects on growth of spiroplasma 1
asporogenous yeast, new species of 323
auxotrophic mutants 103
Azospirillum brasilense 447
Azotobacter chroococcum 243

[B]

Bacillus subtilis 477
Bacillus subtilis (*natto*) 345
Bacterial proliferation 271
ballistosporogenous yeasts 115
batch growth 91
Bifidobacterium bifidum.....103, 167, 507

[C]

calorimetric study of sugar transport 233
Candida agrestis sp. nov..... 85
Candida montana sp. nov. 85
carrageenan decomposing bacteria 145
Cd-inhibition of nitrate uptake in *Anacystis* 297
cell division cycle 79
cell surface acid-phosphatase 79
cellular fatty acid 171
chemostat 447
chemotaxonomy 305, 365
Chlamydospore.....187
ciliate protozoan, *Colpidium colpoda*..... 41
Class Mollicutes 1
coenzyme Q, of yeasts and yeast-like fungi 51
colony formation 271
corn stunt spiroplasma 1
crude oil..... 41
curdlan 319

[D]

Desulfovibrio 171
diaminopimelic acid type 459
DNA base composition.....395
DNA base composition in *Pseudomonas radiora* 421
DNA-DNA homologies 287
durability 507

[E]

electrophoresis 115, 305
electrophoretic comparison of enzymes ..395
electrophoretic patterns 365
energy-coupling, between alcoholic fermentation and glutamine synthetase ...355
enhanced degradation rate 41
enzyme patterns 115, 305
Escherichia coli 195
Escherichia coli K12.....223
ethanol-polyacrylamide-kappacarageenan entrapped yeasts 379
exchange enzymes 429

[F]

fatty acid in *Pseudomonas radiora* 421
fermentation, yeast density by nephelometry 467
fermented products in Thailand 487
Fusarium oxysporum 187

[G]

genetics for anerobic bacterium 103
Gluconobacter oxydans subsp. *oxydans* ...327
glucose transport in *Saccharomyces cerevisiae*.....233
glutamine, production by coupling with energy transfer 355

glutamine synthetase, *Micrococcus glutamicus* 355
γ-glutamyltranspeptidase 345

[H]
Hansenula 365
hydrophobicity 195
3-hydroxy fatty acid.... 17

[I]
infection, *Rhizobium trifolii* 281
inhibition 335
inhibition of white rot 257
insertion element IS1 223
iron-oxidizing bacteria....177
isolation of marine cytophaga....145
isocitrate dehydrogenase 243
isozyme variability 205

[K]
Kineosporia aurantiaca 319
Kitasatosporia setalba 459

[L]
Lentinus edodes 205, 217
ligno-cellulose decomposition 257
localized integration.... 79

[M]
mathematical models 91
mating 115
membrane phospholipids 429
methanol-assimilating yeasts 395
microbial degradation 41
Micrococcus glutamicus-glutamine synthetase 355
minimal medium 103
MONOD's parameters 91

[N]
N-acetylmuramidase SG 507
nephelometry, yeast density in grape juice 467
Nitrobacter Winogradskyi 91
nitrogen fixation....243, 447

[P]
Pediococcus 487
petroleum-utilizing bacteria 41
phage taillike particles of *Streptoverticillium* 239
Physarum polycephalum 73
physiological state of bacterial population 9
physiology 447
Pimelobacter gen. nov. 59
Pimelobacter jensenii sp. nov. 59
Pimelobacter simplex comb. nov.... 59
Pimelobacter tumescens comb. nov.... 59
plasmid identification 345
plasmid—*Rhizobium trifolii* 281
plate count method 271
plate count of bacteria 9
PMR (proton magnetic resonance) spectra of yeast cell wall mannans 395
pock formation of *Streptoverticillium* species 239
pock formation with production of phage taillike particles 239
polar head groups 429
polar lipid in *Pseudomonas radiora* 421
polyglutamate production 345
probability of bacterial proliferation.... 9
protoplast 507
Pseudomonas species 17
pyrite oxidation 177

[Q]
quinone system 17

[R]
radiorespirometric method 335
regulation 429
replication 223
resistance plasmid pSC101 223
restriction endonuclease 157
Rhodotorula aurantiaca 323
Rhodotorula hasegawae sp. nov. 323
Rhodotorula lactosa 323

[S]
saccharomyces 305
segregation of marker loci 217
sexual differentiation 79
shiitake 205, 217
single cell isolation 167
solid-liquid interface 195
spherule formation 73
spiroplasma, corn stunt 1
spiroplasma, effects of arginine 1

spore....459
sporulation gene 477
spoVE gene 477
starved cells 9
Stereum rugosum (Pers. ex Fr.) Fr. 257
Streptoveticillium albireticuli 239
Streptoverticillium netropsis 239
submerged culture 459
sulfate-reducing bacteria 171, 335
Sym-plasmid—*Rhizobium trifolii* 281

[T]
taxonomy of genus *Thiobacillus* 287
Thiobacillus ferrooxidans 177
Thiobacillus species 287
transposition 223
Trametes versicolor (L. ex Fr.) Lloyd 257
Tremella mesenterica 79

[U]
ubiquinone in *Pseudomonas radiora* 421
ubiquinone system 17, 395

[V]
Vitis coignetiae 85

[W]
wild grape 85

[Y]
yeasts 365
yeasts and yeast-like fungi, coenzyme Q of 51
yeast density, —nephelometry, grape juice 467
yeast flora 85
yeast taxonomy 115, 053
